Why? The Red Hat difference

- Strategic training for a strategic technology
 - Delivers higher value; not commoditized
 - Skills readiness critical for enterprise Linux adoptions
- Delivered direct by the leader in Linux products, solutions
- Performance-based testing proves readiness of staff
 - A guarantee of technical competency
- Global availability, consistency of quality, instruction
- Up-to-date and accurate technical content
- Pre-assessment system ensures the right course
- "If Linux is part of your IT strategy, then Red Hat training should be part of that strategy"
